Clickteam News for you!

FusionWiki Opens!

FusionWiki is the official encyclopaedia for Clickteam products. We aim to collaboratively document every aspect of Clickteam's currently supported software packages, for the good of the community, and welcome you to join us!

Clickteam gets New Staff!

To push growth of Clickteam's current product line and to begin exploring new products Clickteam has hired three new awesome programmers. Anders "Andos" Riggelsen, Jamie McLaughlin and Jean Villy Edberg are long time experienced Clickteam users and forum moderators whom have collectively created a ton of third party extensions and examples in the forums. We look forward to see what they will bring to the team!

New and Updated Extensions

Several extensions were released or recently updated, you can get them from the Clickteam forums!

Random Multipool - Mokhtar
AESFusion - Jamie
Python Object - Mathias
Window Scroll bar - Ouly
Valueadd - Dynasoft
Events - Ouly

EFFTOO on Facebook

Another awesome Game in Flash!

Effttoo for those who use Gwerdy Chat is a game that allows players to hurl bombs at each other in a attempt to knock the other off their post. It is online and multiplayer where you can also participate as spectator and comment during the game. Thanks to the new Flash plugin and Laceywing, it is now on Facebook, visit the Clickteam forums for more information!

REVIEWS

This game is one of the recently released hidden object games from developer Blue Tea Games, whom has made many awesome click created games using Multimedia Fusion 2 for their publisher Big Fish Games on of the major online portals for casual game distribution. It takes place after the Prince from Sleeping Beauty kisses the princess and she does not wake up, after 1000 yrs the briars have all come back and are threatening to over run the castle as well as the neighboring city.

The game play of this hidden object is to locate and collect pieces of various items you will in turn use throughout the castle to get to the bottom of this mystery and save the day. The levels contain visually appealing levels but the search can prove difficult and require some Hidden object skills. At times it may seem trying to continuously return to the same rooms of the castle but the object of your hunt is clear and does not prove difficult to maneuver throughout achieving your goals. For example, some items you assemble will not be used immediately but you will know what to do with them whereas some are used a few rooms later, this aspect provides the player with the right amount of intrigue to continue the game play. And what would a Hidden Object game be without its choice3 of mini games to add to the entertainment? Throughout the levels of the castle you will come in contact with strange shape shifting objects, some appearing after constant exploration of a room, these provide your hint meter with more juice. Upon finishing the game and awaking the fair maiden Sleeping Beauty you the player will have access to a harder mode with more challenging puzzles. I loved this game and though you could probably finish it in one sitting it proves to be a very challenging HOG, with wonderful visuals, and challenging puzzles and brain power maneuvering. Check it out !
